

## A proud history of DTG LEADERSHIP.

As a pioneer in Direct to Garment printing, Brother always seeks to bring new features and advanced technology to an industry that demands to be on the cutting edge. That's why screen printers, embroidery shops, fashion designers, online fulfillment companies and many other types of businesses rely on Brother to expand their markets with unique customized products creating new revenue streams.

### 1999

Brother began research for direct to garment printing.

### 2005

Brother launched its **GT-541** DTG printer at the ISS in Atlantic City. This model is a CMYK only printer.

### 2012

Brother releases its **GT-3** series printers that combined a compact design with industrial capabilities.

The GT-361 and GT-381 models featured CMYK+W inks to help companies of any size print full color garments.

### 2003

The first beta testing was conducted on a Brother designed and manufactured DTG printer.

### 2008

Our first DTG printer featuring white ink, the **GT-782**, was introduced at the SGIA

Expo. This high-volume printer contained dual platen system for printing two shirts simultaneously.

### 2017

Brother reveals the next generation of DTG printers – the **GTX**. This high volume production unit features advanced print heads and a newly developed Innobella Textile Ink chemistry for a larger color gamut.
